Abstract:
This explains the scientific writing program design motor credit payment transaction application using Visual Basic 6.0 programming language. In scientific writing database is used also by using the program Active Data Object (ADO) which is integrated in Visual Basic 6.0 program itself. Consists of four tables of consumers, collectors, credit and consumer installment. In the end application program for foreign currency transactions will be applied to the PT. Universal ODA to ease in performing activities of motor credit payment transactions, such as creating a report.
